Allit Technologie GmbH: teaming up for your success!

- With more than 50 years of know-how and experience, Allit Technologie GmbH is a strong partner and first-choice specialist serving the needs of plastics processing companies around the world.
- Our innovative solutions in the business fields of development, toolmaking (mould construction) and prototyping enable us to actively assist our clients in reaching their goals with a long-term perspective.
- We attach great importance not only to keeping abreast of technological progress and staying aligned with the pulse of the market, but also live up to our responsibility for people and the environment. We consistently act with a sustainable future in mind because we are well aware that a bright tomorrow requires a bright plan today.
- It goes without saying that a highly motivated and qualified staff boasting professional expertise and long-grown experience is the mainstay of our success as a tomorrow-minded community. And with a knack for quality, **Allit Technologie** has “all it” takes to make your plastics projects perfect!

KNOWLEDGE & KNOW-HOW FOR SOPHISTICATED TECHNOLOGY!

Our range of services at a glance:

- Product design perfectly matched with material/plastics and assembly requirements
- Process and mechanical simulation
- Prototyping
- Robust, maintenance-friendly moulds for serial production
- High-performance moulds for packaging components
- Multi-component technology
- Hybrid technology: metal-plastics
- Stack moulds
- Moulding trials
- Special temperature control technology (vacuum soldering, laser curing, sintered cores)
- Tool coating
- Production-adapted gripper solutions
- Cylindrical grinding and CNC turning on a wage-labour basis
- 3D dimensional reports
- After-sales service (mould servicing, maintenance and modification)

Industry sectors that rely on Allit's quality services:

- Beverage Industry
- Filter Technology
- Pharmaceutical Industry
- Dental Technology
- Inflight Logistics
- Packaging
- Tote bins for warehouse organisation
- Warehouse Equipment
- Household Appliances (white goods)
- Industrial Technology a.m.m.
